

# Linux Foundation LFS201 / Linux Foundation Certified System Administrator Exam Prep Course

---

This repo contains all of the downloaded PDFs, some code, and my Markdown notes taken during the self-paced online LFS201 course hosted by the Linux Foundation. I hope to take the certification exam in early 2019.

Disclaimer: Most emphasis (whether *italics* or **bold** type) used in these documents are from the course materials, but some have been added by me. All screenshots are from course materials. I do not own the images.

## Table of Contents

---

- 0. [Main Repository](#)
- 1. [Introduction](#)
- 2. [Linux Filesystem Tree Layout](#)
- 3. [Processes](#)
- 4. [Signals](#)
- 5. [Package Management Systems](#)
- 6. [RPM](#)
- 7. [DPKG](#)
- 8. [YUM](#)
- 9. [zypper](#)
- 10. [APT](#)
- 11. [System Monitoring](#)
- 12. [Process Monitoring](#)
- 13. [Memory: Monitoring Usage and Tuning](#)
- 14. [I/O Monitoring and Tuning](#)
- 15. [I/O Scheduling](#)
- 16. [Linux Filesystems and the VFS](#)
- 17. [Disk Partitioning](#)
- 18. [Filesystem Features: Attributes, Creating, Checking, Mounting](#)
- 19. [Filesystem Features: Swap, Quotas, Usage](#)
- 20. [The Ext2/Ext3/Ext4 Filesystems](#)
- 21. [The XFS and btrfs Filesystems](#)
- 22. [Encrypting Disks](#)
- 23. [Logical Volume Management \(LVM\)](#)
- 24. [RAID](#)
- 25. [Kernel Services and Configuration](#)
- 26. [Kernel Modules](#)
- 27. [Devices and udev](#)
- 28. [Virtualization Overview](#)
- 29. [Containers Overview](#)
- 30. [User Account Management](#)
- 31. [Group Management](#)
- 32. [File Permissions and Ownership](#)
- 33. [Pluggable Authentication Modules \(PAM\)](#)
- 34. [Network Addresses](#)
- 35. [Network Devices and Configuration](#)
- 36. [Firewalls](#)
- 37. [System Startup and Shutdown](#)
- 38. [GRUB](#)
- 39. [init: SystemV, Upstart, systemd](#)
- 40. [Backup and Recovery Methods](#)
- 41. [Linux Security Modules](#)

- 42. [Local System Security](#)
- 43. [Basic Troubleshooting](#)
- 44. [System Rescue](#)
